

BrainerKids™ Whirly Bee

Like EarneB, this whirly bee has 4 wings!

1. Print this page out on standard printer stock or card stock.
2. Cut along the solid blue lines of the whirly bee
3. Color and decorate both sides with colored pencils, markers or crayons.
4. With a stapler and a glue stick, assemble your whirly bee following the steps and diagram below:
 - + Fold wing A and wing D away from you along the dashed lines (so they stick out 90 degrees)
 - + Fold wing B and wing C towards you along the dashed lines (so they stick out 90 degrees)
 - + Fold part E away from you along the dashed line and glue flat to the back of part G
 - + Fold part F away from you along the dashed line and staple to the back of part H (this will be your handle)

5. Have an adult help drop your whirly bee from a safe high place, such as standing on a chair or a stepping stool. Drop so the handle is pointing down and larger wings are at the top.
6. Experiment with adding more weight to the end of the handle with additional staples or by adding a paperclip (or both). See how these changes affect the whirl of your bee!
